LAFAYETTE INSTRUMENT BUSINESS UPDATE

Polygraph Remains our Top Priority

Lafayette, Indiana U.S.A, May 17, 2017– Lafayette Instrument Company will no longer be a Converus Service Partner or provide EyeDetect systems/licenses.

“Polygraph is our top priority, our strength, and we know that we will be able to best serve our customers by focusing on their needs and the advancement of polygraph technology.” Jennifer Rider, President

Lafayette is the leading manufacturer of polygraph solutions; with many large-scale projects underway, it is well-positioned to launch the next generation of polygraph instruments, software, and training before the end of the year. In the years to come, Lafayette Instrument will continue to work with customers and partners to enhance and expand the already robust credibility assessment programs that are in operation around the world.

We value PEOPLE, INNOVATION, and QUALITY.

Lafayette Instrument Company was founded by a gifted young inventor 70 years ago and is now a highly skilled team of Engineers, Developers, Technicians, Support staff, and Production personnel specializing in electronics and instrumentation engineering and manufacturing for polygraph, life science, and human evaluation professionals.

It is our mission to develop and deliver industry-leading data acquisition and analysis solutions that advance safety, security, science and medicine.
